Print Ease: A Campus Quick-Commerce Platform for On-Demand Academic Printing

Guided By:

Dr. A. Mohan

Dr. E. Meganadhan

Done By:

Saranraj M (192511182)

Manoj M (192511060)

Denzil moses S (192511036)

Problem Statement

- ❖ Saveetha University students often get access to hall tickets and certain academic documents very close to the examination or submission time.
- ❖ Students must obtain printed copies immediately, but the available printing support inside the campus is limited.
- ❖ Hostel students face additional difficulty because urgent printing outside the campus may not always be feasible.
- ❖ The dependency on a single campus print shop creates congestion, long waiting time, and service delays during exam periods.
- ❖ Last-minute printing of hall tickets, assignments, and records becomes stressful due to queue overload and lack of a structured ordering system.

Introduction

- ❖ Printing academic documents is a common and essential need for college students.
- ❖ Students often face difficulty printing hall tickets, assignments, and records on time, especially during urgent situations.
- ❖ Limited campus printing facilities and long queues increase the problem.
- ❖ PrintEase is proposed to connect students with nearby print shops for quick and reliable printing services.
- ❖ The system supports document upload, order placement, and print delivery or pickup.

Proposed System

- ❖ **Print Ease** is a web-based campus printing platform developed to handle urgent academic printing requirements efficiently.
- ❖ The system enables students to upload documents such as **hall tickets, assignments, records, and lab-related files** through an online interface.
- ❖ Students can select a nearby print shop, specify printing details, and place the order digitally instead of visiting the shop first.
- ❖ The print shop owner receives the request, views the document details, prints the file, and updates the order status through the system.
- ❖ Overall, the proposed system provides a faster, more organized, and student-friendly solution for academic printing inside and around the campus environment.

SIMATS
Saveetha Institute of Medical And Technical Sciences
(Declared as Deemed to be University under Section 3 of UGC Act 1956)

Existing System

- ❖ Students currently download hall tickets, assignments, records, and other academic documents manually from the college portal or their devices.
- ❖ To obtain printed copies, they must visit a print shop directly and wait for the printing process.
- ❖ There is no proper system for online document submission, advance order placement, or print status tracking.
- ❖ The existing process is fully manual and becomes inefficient during last-minute academic printing needs.

Objectives

- ❖ To develop a web-based platform for **on-demand academic printing**.
- ❖ To help students print urgent documents such as **hall tickets, assignments, and records** without unnecessary delay.
- ❖ To connect students with **nearby print shops** through a digital ordering system.
- ❖ To support efficient management of students, print shops, and printing orders through a centralized system.

Technology Stack

- ❖ **Frontend:** HTML, CSS, JavaScript
- ❖ **Backend:** Spring Boot (Java)
- ❖ **Database:** MySQL

Workflow

11

WORKFLOW / WORKING OF THE SYSTEM

PrintEase allows students to place print orders online. The request is processed by the print shop owner and managed by the system. Admin monitors the complete workflow.

In Summary: Student places an order → Shop owner prints and updates status → Student receives the print → Admin monitors the whole system.

Advantages

- ❖ Reduces the difficulty of **last-minute academic printing** for students.
- ❖ Helps students obtain urgent documents such as **hall tickets, assignments, and records** in a faster and more organized way.
- ❖ Saves time by allowing students to **upload documents and place print orders online** instead of visiting the shop first.
- ❖ Benefits **hostel students** by providing a more convenient way to access nearby printing services.
- ❖ Supports both **pickup and delivery**, making the system more flexible for urgent academic needs.

Future Enhancements

- ❖ Add **online payment integration** for digital transaction support.
- ❖ Introduce **live order and delivery tracking** for better user convenience.
- ❖ Integrate with **more nearby print shops** for wider service availability.
- ❖ Provide **priority printing support** for urgent hall tickets and exam documents.
- ❖ Expand the platform to support **multiple campuses and institutions**.

(Declared as Deemed to be University under Section 3 of UGC Act 1956)

Conclusion

- ❖ **PrintEase** is a web-based solution developed to support urgent academic printing for students.
- ❖ It helps address problems such as **late hall ticket access, queue congestion, and limited printing availability** within the campus environment.
- ❖ Thus, the proposed system improves the efficiency and accessibility of academic printing services in Saveetha University.
